Dear Sir/Madam,

I was excited to see your representants of the company on 24 of October at Career Fair at KEA. I was very happy about the Web Designer Intern position and I am confident I fit the description. I am looking forward to discuss in more detail at the interview.

I am in third semester of study at KEA being a student of Multimedia Design and Communication, I am very motivated to be part of your team and I am more than ready to learn new things.

Before starting the internship I already planned some courses to accomplish in order to be more prepared for the internship that I am at this point. I am very passionate about programming and I think it is the most important thing in a coding career. I am a very hardworking person and a good timekeeper in what concerns my work.

Beside my abilities and my knowledge, I think my attitude and personality will play an important part in the development of your company. I am always looking for new challenges and I am not scared of extra responsibilities.

I am aware Relesys that wants confident interns that have a unique and creative vision about the industry and their own work and Relesys is always looking for talented persons with a passion for creating ambitious, high-quality titles and products.

Please take a moment to review my attached resume where I give more details about my education background such as my AP in Multimedia Design and Communication, my experience with different programming languages and tools and I would really like to invite you to have a look at my portfolio
